IN THE SPECIFICATION

Please amend the original Abstract at page 48, lines 1-12 as follows:

ABSTRACT OF THE DISCLOSURE

A user terminal has two ~~screen~~ screens. One screen displays content in a state intended by the creator of the content. The displayed content is composed of a plurality of bocks, and each block can be enlarged. Content corresponding to a block for which enlargement is directed is displayed on the other screen. The content displayed in the other screen has an enlarged form. Regarding the enlargement, rules are set. For example, an image or the like ~~is processed so as to be enlarged~~ that is the subject of processing to be enlarged is processed without changing vertical and horizontal ratios. ~~The present invention is applied to a device that handles electronic books.~~
